LIFE CHANGING! I contacted Dr. Turner in December. At that time my migraines were terrible at best. I had tried everything under the sun, seen every doctor possible, and had every test done imaginable. I have spent THOUSANDS trying to cope and deal with my migraine and vertigo issues. Dr. Turner was my last plea for help and I have never been so grateful in my whole life. It is now March and I can now say I am happy to get out of bed in the mornings, can go ALL day with no symptoms, and live a normal pain free life. Dr. Turner is the opposite of the drug pushing, symptom masking, test taking doctor. He WILL get to the bottom of your issue and FIX it forever! If you have migraines, you need Dr. Turner!

I am amazed that this treatment ACTUALLY worked for me! After dealing with migraines for 30 years, this is a Miracle! Dr. Turner is easy to work with, and office visits on the internet are also smooth and efficient. His staff is very pleasant and accommodating as well. DO YOURSELF A FAVOR AND GET EVALUATED!

This has been a life changing process and I can't recommend Dr. Turner and the amazing staff at Texas Migraine Clinic enough. I've suffered with migraines for decades and have taken meds for almost 20 years, to the point I was about to inject another med into my stomach for relief. Dr. Turner turned my life around and did it without having to take any medication. I am forever grateful for what Dr. Turner Has done for me.

Had migraines since I was 12 years old. Went through the typical pharmaceutical paradigm for years and never had success. For the first time in my life not only do I feel confident that I will never have another migraine, but I'm at ease knowing exactly what caused them and what to do should I ever have another.

So grateful and blessed to have found Texas Migraine Clinic. Literally life savers.

★★★★★ a year ago -

I went from daily migraine medication (Topiramate) for over 10 years, to zero meds within 2 months of my first visit with Dr. Turner. I've remained migraine-free for the past 6 months, having to only take a "rescue" triptan one time for a very mild migraine. This is coming from someone who used to have a migraine every 2-4 days prior to daily medication. Dr. Turner takes time with his patients to find and treat the root cause of the issue. Further, a few visits is usually all you need, not like certain types of ongoing therapy that is costly and time consuming. I'm so thankful to have found TMClinic and Dr. Turner!

I suffered from Cluster headaches for 7 years, I have been to a neurologist, had a MRI done, tried every medication, and the only thing that helped was Oxygen. That was until I came here and found out the way to solve my pain wasn't with my head but with my neck. After 2 weeks of seeing Dr. T my headaches had decreased and I was able to sleep though the night. As of today it has been about 2 weeks since my last cluster headache and I am able to sleep comfortable at night without worrying about having another headache. Thanks to Dr. T and Megan I have my life back!

I have taken every class of oral medication, infusions, and botox shots. Dr. Turner and his staff are great to work with and you don't have to go to their office. I am in central Mexico, so all of my treatment took place via zoom. I am off botox and all other migraine meds now. It has been life changing!

Dr. Turner and his staff are amazing. I suffered from migraines for 22 years and within 6 weeks I was migraine free! I had tried every medication, treatment, diet, exercise and diet supplement out there and nothing would cure my menstrual migraines. I saw results from this therapy within the first few weeks. The great part was that I never had to leave home. I did the entire treatment through FaceTime so I didn't have to make the 2 hour trip to his office.

After having migraines (that no doctor could actually heal) for over a decade and ending up being carted out of my home by EMT, blind and unable to speak, with my last hemiplegic migraine I knew I had to find a solution. So glad I found Dr. Turner! Not only did he explain what was happening to me and why but he completely fixed it and when he saw that I had sciatica he fixed that too!! I've never left a review for anything in my life but the healing in this place is phenomenal. If you're suffering like I was look no further. THIS IS THE PLACE.

Dr. Turner was so great to work with. He really helped me with my issues of migraines and pain in my neck and shoulders. I had tried pretty much everything else: chiropractor, massage, and even surgery. Nothing had helped until now. Now I have the tools to use if I ever need to again. Thanks, Dr. Turner!

Migraines for over 20 years, woke up with a daily headache for the last 10-15. After using Dr. Turner's therapy I have not woken up with a headache or had a migraine in over a month. My sciatic is also 100% better. His 6-week therapy is Awesome! Love the fact I can have my visits from my home and the therapy WORKS!!!! I am one happy patient! Thank you Dr. Turner. :)

I first visited Dr. Turner four years ago when my migraines had gotten to the point that I was no longer living a normal life. I was stuck in a pattern of pain and frustration, and had tried every other medication, treatment, or pain plan in the book. After a pleading Facebook post, a friend told me about Dr. Turner and how much he had helped her. I made an appointment immediately and started feeling better within the first week. Within 3 months, I had my normal life back again!

A few months ago, I started having symptoms again (after 4 years of blissful relief) and made another trip to see Dr. Turner. Once again he has worked his magic and I am back on the road to recovery. I thank my lucky stars every day that I met Dr. Turner - his physical therapy plan is a God-send!

Dr. Turner is a miracle worker! I had DAILY headaches for 19 years! No medications provided permanent relief and five neurologists, PT, and chiropractic could not do what Dr. Turner accomplished in less than six weeks!! I have been headache-free, DAILY, since our 5th session!!! Please give this therapy a chance. The office is comfortable and centrally located and the staff is fantastic! This therapy is worth every penny spent, ten times over. I am grateful for Dr. Turner and his phenomenal therapy. It works, when nothing else will.

1 review

★★★★★ 4 weeks ago

Dr. Turner listened and figured out the problem was in my neck, in just a few short weeks Dr. Turner was able to get me out of pain that I have had daily for 30 years. I was told I had migraines and have been kept on a wide variety of medicines that just gave me no relief. Neurologist after Neurologist would say things like "oh you have migraines here are the meds you should take" never really listening to me when I would say "how come I can't turn my head to the right" "Why can't I look up".

I would HIGHLY recommend Texas Migraine Clinic!!

Dr. Turner and staff are kind, caring people.

I've had episodic cluster headaches for 25 years. I've seen neurologists, chiropractors, massage therapist and acupuncturist - with little to no relief. I was going through a cluster cycle and came across Dr. Turner's practice. If you suffer from cluster headaches and want relief, you must contact Dr. Turner! He does a great job of explaining the cause and the symptoms. The techniques are easy to follow and very doable! I too was apprehensive about the zoom visits, but it works! He is personable and his office staff is awesome too!

After struggling with constant migraines, along with neck, shoulder and back pain for my entire adult life, I finally took the plunge and visited Dr. Turned. Honestly, I'm kicking myself for not doing this A LONG TIME AGO! He is compassionate, and focused on correcting the cause of the problem (rather than medicating the symptoms). Within the first few sessions, I was already noticing huge improvements, and after 3 months, I'm mostly pain free! If you're on the fence about checking him out, don't hesitate! It's so worth it!

I wish I came to Texas Migraine Clinic years ago! I suffered from migraines for 14 years. I tried all kinds of meds, massage, dental intervention, herbal remedies with little to no success. I googled migraine specialist and saw Dr Turner's webpage. I had a consult and committed to the process. It was so nice to say out loud how much migraines have affected my life. Weekends were spent often in bed or the sofa. I had to push through the week to work and just to function as a person. I learned to be in pain and accept it. Everyday was started with fearful thoughts of when the migraine would start. I spent 4 months in Dr Turner's treatment. Holy Cow! It's amazing. I am 95% migraine free. I used to have an average of 16 migraine days a month. Now, I have 1 maybe 2 migraine days. And they are minor. No more pills. No more oils. I was angry that no doctor had ever told me about my disc or the possibility of this intervention. I wish everyone who suffers from migraines or has a loved one that suffers ones about Texas Migraine Clinic. I've called one person in my life a "superhuman" and now, this is my second ; Dr Turner is a true superhuman and has changed my life. Thank you Texas Migraine Clinic.

Absolutely fantastic experience. I had been getting migraines for a few years prior to seeing Dr. Turner. Every other Dr. I went to treated the migraines with everything from triptans, to anticonvulsants, to Botox. He's the only Dr. who determined a cause and treated the cause. Treatment is simple and non-invasive. It's amazing that this isn't a wide spread practice. A DOCTOR WHO ACTUALLY WANTS TO HEAL YOU!!!!

1 review

★★★★★ 4 years ago

After 25 years of what I was told were muscle induced headaches akin to migraines, I was pessimistic that anything short of surgery would cure the problem and only strong medications would control symptoms. Dr. Turner's basic exercises were simple, easy to execute, and effective. I most appreciated the ability to attend the bulk of my appointments via Skype, significantly reducing time away from my family and work, and preventing me from having to use vacation or sick time to cover my appointments.

All of the women on my mother's side have had fibromyalgia and we assumed there wasn't a way to fix it because that is what doctors had told us. I would take pills after pills, hospital stays and even tried Botox but nothing would ever make it fully go away. Dr. T showed us there was. I now am migraine free after having a constant migraine for 5 years, and migraines before that due to my fibromyalgia. I am very thankful for all he did. He does a very thorough job of explaining what he is doing, and would answer all of my questions without making me feel stupid. Dr. T saved me from all the pain pills I was taking for my migraines. Instead of trying to treat me for my problem, he fixed the problem. Give him a chance and you won't regret it!

★★★★★ 4 months ago

I was initially a bit skeptical of this process as it really is not in my nature to reach out to a doctor in another state via zoom calls; however, I was tired of the constant migraines I was getting and was getting desperate to try anything that might help. I'm so glad that I did! On our first evaluation call (which was free so everyone should at least give the evaluation call a chance), Dr. Turner explained the physiology of what was causing my symptoms in a way that no one else ever had and it made complete sense. Each session for me was roughly a 30 min zoom call where we would talk about the symptoms I was experiencing and he would give me exercises to do to help. After only 4 sessions (and actually doing all of the exercises he recommended between each session), I could tell a huge difference. I had a situation at work that 100% would've caused a migraine in the past and I could feel the initial symptoms start, but the migraine never actually came. It was such an incredible feeling to realize that after experiencing migraines for nearly half my life, I may not have to any more!

To summarize: I would highly recommend Dr. Turner and the Texas Migraine Clinic to anyone who is tired of dealing with migraines and the terrible impact they have on your life. The cost was very reasonable, particularly considering the long term migraine relief that I should experience. Dr. Turner is clearly very knowledgeable on the topic and everyone I interacted with was friendly and professional. I would definitely give them 5 stars!

I have suffered from migraines ever since I was a little girl. After years of trying what I thought was everything, I came across the Texas Migraine Clinic. I decided I had nothing else to lose, so I decided to give it a shot. This is the BEST decision I have made, and I can't believe how life changing my experience has been.

Since the start of my treatment, I have only had to take my migraine meds one time in almost two months- which would normally be at least two times in a week for me. Incredible!!!

Dr. Turner and his staff are absolutely wonderful! I have had plenty of experience with many different clinics, and this place is top notch!

Don't wait another second, make your appointment. I promise you will be so glad that you did!!!

I had been dealing with headaches for over 20 years. I would go pain free for small amounts of time but never completely rid of them. I relied on OTC medication to decrease the symptoms and went to multiple doctors trying to find a lasting solution and never found one. After Dr. Turner's treatments I am finally living without constant headaches. He explained everything very thoroughly throughout the process and the ability to conduct most of appointments via face time was great. Not worrying how severe my headache will be today or the headache ruining the day especially after a hard workout has been awesome.

Dr. Turner is a master of his craft. I was skeptical after reading the amazing reviews of this natural way of treating migraines, but after going through his program I've had zero migraines and very few headaches. His approach makes sense and targets the cause of the problem. The idea of using medicine to remedy symptoms doesn't address the underlying cause like Dr. Turner's approach. I highly recommend seeing Dr. Turner before seeking other more invasive approaches. Thanks, Dr. T!

Dr. Turner is extremely knowledgeable and gets to the source of the issues. I was suffering with debilitating vestibular migraines since August 2017. I went to 2 ENT Dr's and 2 Neurologists and all I was given was medications to mask my symptoms. I was at a breaking point in April and was on 10 different prescription medications and couldn't envision living like that forever. It is now June 16th 2018 and I am on absolutely no migraine preventatives/ pain meds/ migraine abortive medication, etc. I have completely weaned myself off everything . I have not experienced any migraines since I started the treatment plan with Dr. Turner. Thank you Dr Turner for truly caring for your patients . You are a blessing and may God continue to bless you and your practice.

First and foremost, I now have my life back in a way I never thought possible amidst all of the pain.

I never thought I would be mountain biking, trail running, hiking, going on multi-day backpacking trips, traveling abroad, rock climbing, renovating houses with my husband for out company and general adventuring and growing in to my life's purpose to the level that I am. Since my final appointment about two years ago, I've been to Hawaii, Spain, Portugal, France and Thailand where I've been cliff jumping, scuba diving, snorkeling, repelling, surfing, taught my nieces to rock climb, climbed a 14er, explored slot canyons, hiked and got engaged at the top of Zion to an amazing and adventurous person, and now rock climb, run, hike and mountain bike nearly every day. I attribute my ability to do these things to Dr. Turner and his team.

I just want to say thank you to Dr. at and his team. They have made a huge difference in my life. It's unrecognizable to what it was a few years ago and I cannot express my gratitude enough. The work they do is amazing and I tell everyone I can about the work they do hoping that they too reach out and experience relief and the life that they want as a result.

If you experience migraines and/or pain in your shoulders, upper back and neck as I have for 23 years then You need to check out Dr. Jeff Turner. I saw Dr. Turner remotely over Zoom (I was a little skeptical of the remote treatment but it works). After 1 month of treatment exercises I went from migraines 5 days a week to about 1 and now after 3 months and 6 actual Zoom appointments I only get 1 or 2 a month and they only last a few hours, not days. This has changed my life. I used to be afraid to do normal things because they would trigger intense and long-lasting pain for days on end. Of course I still have to be careful not to overdue it while healing. Dr. Turner has given my life back.

As a younger individual with no previous medical history, I was really scared when I suffered my first migraine at the age of 22. I was nearly kept home from nursing school, clinicals, and work most days as my symptoms persisted for over a month, unrelentingly. After numerous ER visits, a few primary care office visits, followed by an MRI and CT scan, I had no answers to the cause of my headache, numbness/tingling, back, shoulder and eye pain that left me feeling like I would never feel normal again. When I was offered Aimovig (a monthly injectable for migraine prevention only FDA-approved for a year) by my primary care provider, I knew I had to search for another option. When I found the Texas Migraine Clinic, I received a personal over-the-phone consultation from Dr. Turner, who listened very intently to each of my symptoms, which instantly put me at ease, as my symptoms had been previously "brushed off" in the ER and by my primary physician. When I visited with him the following week, he explained where my migraines were coming from, which no medical professional had been able to do. After 3 months of office visits, I am happy to report that I sat for my RN licensure exam last week HEADACHE FREE. I am so happy to have found Dr. Turner and his staff — they have given me my sense of normalcy back, and for that I will be forever grateful. Please give the Texas Migraine Clinic a try!!

Dr. Turner is a godsend I am so glad I found him and it was by accident but I am very blessed I did!.. I have been suffering with migraines since I was 16 years old... I'm 44 now!.. They just kept getting worse and worse and I've tried every medication there is from all sorts of pills to injections and still no hope in sight..:(

I love being outdoors but with my migraines it's not possible.. if it's too bright or too hot it all triggered my migraines. Life just wasn't that great..:(

Dr. Turner has helped me tremendously!.. I haven't had a bad migraine since the 26 and 27 of October 2020! My migraine lasted 2 horrible days.. Missed work and stayed in bed all day long in pain..:(

Whats crazy is I started to see him on the 29th of October and like that!!.. Boom!! There Gone!!!

Not one headache or migraine since then!..:(

God Bless You Dr. Turner!!

Thank You so much for giving me a life without pain and medications...🙏🙏🙏

Dr Turner is absolutely amazing at what he does, and what he does is truly work on the root of migraines/headaches. I have had migraines since I was 8 or 9 (15 to 20 years) when I had a neck injury and most likely a concussion, I had tried so many different medications and treatment options with no real hope of getting rid of them. I have missed family weddings, family dinners, meeting up with friends, and calling into work from them that I didnt know what else to do. Dr Turner took the time to discuss everything with me and the first time I saw him back in 2018 I was having 5 to 6 headaches/migraines a week and after 4 treatments with him I didnt have any for 3 months! All this with no medications. Life gets in the way and I hadn't seen him since then but I'm so glad I got back in and am looking forward to get rid of them for good cause with 2 kids I dont have any time for migraines. If you are suffering from headaches or migraines give Dr Turner a call, you will be so glad you did!!! Thank you Dr Turner for helping me!! You are the best!

Migraines and neck pain had taken over my life and I was desperate for a cure. I tried medications with bad side effects, massage therapy, chiropractic adjustments, and acupuncture, but nothing worked. Finally, I found Dr. Turner on Google and he has changed my life! I no longer get migraines and I'm no longer in constant pain. One of the best things about him is there's no surgery, medication, or radiology involved! He taught me exercises to correct bulging disks in my neck and lumbar spine. I was skeptical but willing to try anything and I am so glad I did. Also, shout out to his amazing bedside manner! I looked forward to our appointments because he was so great.

I'm so very grateful for finding the Texas Migraine Clinic this summer. After suffering from acute, pounding headaches, that included nausea and impeded my ability to sleep for more than an hour or so - different from the migraines or sinus headaches I've experienced in the past - Dr. Turner and his incredible staff quickly diagnosed the disc issues that were leading to the headaches and pain, and set up virtual treatments that very quickly remediated the symptoms and helped me with daily therapeutic exercises and ergonomic products to ensure that I will have a long-term recovery.

I can't say enough how tremendous Dr. Turner and his team are, so kind and helpful, and it was also such a relief to have these sessions all virtually, removing any risk of exposure during this pandemic, and for me personally, any fear of manual manipulations after previous experiences with chiropractors that left me in more pain than what I started with. I'm especially thankful that I was on-boarded into the schedule so quickly for treatments, after my PCP was uninterested in offering any guidance other than for me to drink more water, leaving me suffering for weeks before finding the TX Migraine Clinic after searching online.

Thank you, Dr. Turner, Annabelle, and the entire staff at Texas Migraine Clinic. Your help and insight has helped me transform my daily life to reduce stress on my discs and joints and live without pain.

★★★★★ 3 weeks ago

I was so tired of multiple healthcare providers offering me temporary solutions for my debilitating migraines without ever getting to the root cause of why I was having them. The chiropractor was actually making it worse, the medications had terrible side effects, and everything was an ongoing cost and hassle. The constant pain, nausea, fatigue and other symptoms were ruining my life. Even after a neurologist diagnosed my bulging cervical disc, they only suggested ongoing Botox injections and medications to numb the pain. I knew there had to be a better solution.

Dr. Turner offers a rehab program that actually guides you on how to fix your disc for lasting relief and the knowledge of what to do if you have an issue in the future. It only took a week to start seeing progress and at a few weeks out my migraines continue to reduce in frequency and severity as my disc continues to heal. The approach is common sense and rooted in science. As an epidemiologist, these factors are important to me. The cost was reasonable, especially compared to other migraine programs I found who promised to find the cause by doing things I had already done (like looking at food triggers, etc).

I took a chance on Dr. Turner because he was one of the only doctors who could actually explain what was causing my pain and how he could not only fix it, but give me the tools to do so even after our sessions were over. There were also product recommendations for ergonomic tools to help keep my neck in better alignment. He knows his stuff and I am very glad I found him and trusted him with my care. His staff is also friendly and helpful, and overall it was a great experience from start to finish. The remote appointments were a safe option during the pandemic and convenient with my work schedule. I'm recommending him to all my friends and family who suffer with headaches and/or neck pain. His free consultations are a risk free way to see if he would be a good fit for your particular symptoms, even if you haven't had a MRI or other imaging. He is truly a fantastic PT and a genuinely nice person. Highly recommend!

Dr. Turner's methods and techniques have helped me extensively over the past several months. What he has done for me no other neurologist was able to do with Botox, nerve blockers or medications. His methods are simple and effective. I have suffered from migraines for several years and he was my last resort. I am thankful that my wife was able to find him. His assistant Anabell, was extremely nice and always on top of office reminders. If you are patient and in search for a better method that will help alleviate your pain this is the place for you.

Dr. Turner is a lifesaver! I have suffered with migraines for more than 25 years and have seen countless doctors and have tried every medication. Nothing worked. I decided 2 years ago to not take any medication at all and change to a holistic and organic lifestyle. Although I felt healthier in every aspect, I still had migraines and still could not exercise without triggering a migraine. I saw Dr. Turners YouTube video one day when I was desperately searching for relief. I decided to give it a try. It was a quick process to get started and staff was great and accommodating. I did everything Dr. Turner suggested. I saw immediate results in many symptoms. I'm happy to say that now after several months I have 90% fewer symptoms and when I do have a headache it hasn't progressed into a migraine. My therapy daily exercises will continue until May and I am confident that I'll keep progressing to 100% relief. If you have tried everything, you have nothing to lose. TRY IT! Get your life back!

I highly recommend Dr Turner. He is just brilliant! He patiently listens to your problem and doesn't give up until its resolved. I was suffering from bad migraines and face/head pressure for past 4 years. I had to take pain meds very often which had side effects. I wanted to get rid of the problem, not just take care of the symptoms by taking meds.

Dr Turner technique is so simple, natural and logical. He works on the spine which is the source of all headaches and back pain. After he explained the science behind all this, it made sense. He corrected my posture, how I read, watch Tv and work on my computer etc. I had no idea how I was further complicating my problem by bending my back the wrong way. I learned a lot through this process. It's been 5 months and I haven't had any migraines which is very unusual for me as I used to get them almost every month.

I can't thank Dr Turner enough for making me feel like a normal person again. Now I can make plans and do things without having to worry about those bad migraine attacks.

Last but not the least, the staff is very friendly and prompt and that makes the overall experience just awesome! Annabelle is super sweet!

Before coming to this clinic, I suffered from migraines for years, during which time I was prescribed a rotating cocktail of pills that had little effect on my pain and made it much harder to do my job effectively. Dr. Turner was able to teach me how to reverse the underlying cause of my pain without the use of medication, and I feel well-equipped to address any potential flare-ups on my own in the future. What a relief!

I had a great experience with Dr. Turner and his staff. They are so friendly and helpful. My headaches/migraines were daily before I began treatment and now I am so much better. Headaches don't interfere with my day to day activities anymore. I have tried several approaches—natural, holistic, medication, you name it. I am so thankful this therapy approach has provided me with relief from my neck, head, and back pain.

I became a patient of Dr. Turner's in May of 2017, when I also became his employee. I did not consider myself a migraine sufferer, but for the sake of learning Dr. Turner's practice, I had an evaluation by him. That is when I learned that my allergies/sinus/face tenderness, TMJ, watery eyes, teeth pain, tinnitus, and the headaches I got right before my menstrual cycles, were all caused by the nerves in my neck! I used to take a daily Zyrtec for my "allergies." Since my eval and learning which movements helped me, I have not needed to take any allergy medication! None! I have not suffered from allergies during this whole time. When I start to get the familiar tickle down my throat—the first signs of my "allergies"—I make the movements prescribed and the allergy symptoms are abolished! I no longer have face tenderness from my sinuses being full, or pain in my teeth, or go home with little make-up from wiping away tears produced by allergy eyes. I have not had a menstrual migraine since July of 2017! My TMJ is gone! What a blessing!

After the great results of my neck/head eval, I asked to have my back evaluated. My plantar fasciitis has disappeared! And also, the pain on the tops of my feet, calf tightness, and the cramping from my toes all the way to my hamstring. All gone!

Because I work in the office, I am a witness to patient's healing. Everyday someone mentions the misery they experienced daily, until becoming a patient. (Some even considering ending their life!)

I pray that those who need relief/healing will find their way to the Texas Migraine Clinic!

I have had debilitating migranes and neck pain for over 20 years and was very inspired after watching Dr. Turners videos. I live in NY and thought that may be a barrier to receiving care but Dr. Turner made it happen!! . I had my first zoom consultation with him and he was absolutely delightful. Very professional, extremely knowledgeable, and kind. He really listened to my issues and concerns and went beyond my expectations to help me when I really needed it most. I'm actually hopeful for the future for the first time in a long time. Hopefully looking forward to days with less pain!!

When I started with Dr. Turner I could barely tilt my head up. I had alot of pain and grinding and popping in my neck along with my migraines. In a short amount of time I have resolved most all of my neck pain and regained a high degree of my neck mobility. I have seen a significant improvement in my related headaches and head pain.

Prior to working with Dr. Turner, I had been dealing with migraines for over 30 years. At the time treatment started, I was in pain almost every day, and it was having a severe impact on my quality of life. I was running out of prevention and treatment options as nothing was working well or for very long. After treatment with Dr. Turner, I have reduced the number of medications I am taking and the frequency. I have gotten significant improvement in all my migraine symptoms, to include pain, nausea and others. My quality of life has dramatically improved! Dr. Turner taught me how to address the root cause of my pain in a way that is easy, repeatable and accessible to me at all times.

I appreciate the friendly and helpful staff and flexible hours for scheduling. The process was easy and treatment was cost effective. I am deeply appreciative of the care provided by Dr. Turner and his staff.

Amazing doctor. I'm weaning off my preventative vestibular migraine med now as a direct result of the exercises that I did with dr turner (been on them for six years). The information he shares on the why and how is really helpful and appreciated as part of the process. I noticed results within the first week. He also gave me some bonus lower back exercises as part of our (only) four treatments. Simply amazing. If I could give him 10 stars I would.

Life changing therapy sessions with Dr Turner. Prior to going to Dr Turner I was experiencing daily headaches and missed work at least once per month with frequent debilitating headaches. I finished my therapy sessions about 3 weeks ago and have not had any symptoms. I was unable to do something as simple as jogging without massive headaches afterwards. Now I'm back on the treadmill working towards a 5k and have not had any issues. He's very friendly and knowledgeable. He does not recommend medication and really does get to the root cause of the issues. I would highly recommend Dr Turner to anyone experiencing back or neck pain or migraines.

April 26, 2019

For four (4) long years, I experienced debilitating vertigo, which caused me to be unable to stand, and consistently caused violent vomiting, severe dizziness and inability to focus on tasks. I initially sought treatment from an otolaryngologist and a neurologist at the Houston Medical Center. After two MRI's, a CT scan, X-rays of the upper torso, treatments by an expert on ear "crystal" alignment, my vertigo continued. I was referred to another neurologist in Dallas who had expertise in vertigo, and was ultimately diagnosed with "vestibular migraines". I was unable to tolerate the medicines prescribed by the second neurologist and the vertigo and severe dizziness continued. After suffering a fall at my home during another severe episode of vertigo, I searched the internet for "migraine doctor San Antonio", due to its close proximity to my home. The Texas Migraine Clinic showed up on the search and I was able to obtain an appointment with Jeff Turner, DPT, as his San Antonio office. I received immediate relief after only two treatments in Dr. Turner's office, where it was explained that my neck, specifically the C5-C6 disc, was the likely source of my vertigo issues. After four (4) years of debilitating vertigo, and after only four initial treatments from Dr. Turner, and following his regimen of proper sleeping position, simple neck exercises, and proper head and neck alignments and positioning, I have experienced only very minimal vertigo on literally a handful of occasions over the past 8 months, which is a far cry less than the almost daily occurrences, I previously experienced. These relapses, in my opinion, were caused by doing things that were adverse to my neck alignment. More importantly, if I feel the first sensation of dizziness, by properly aligning my neck and head as instructed by Dr. Turner, I can abate the dizziness almost immediately, thus eliminating the vertigo before it becomes severe. My follow up treatments have been less than 5 since the initial treatments concluded in September, 2018, and were mostly at my request to reassure me that I was on the right track to healing. My rating of Dr. Turner and his staff would be nothing less than 5 stars.

This is a must!!!

Everyone should know about Dr. Turner and his very well educated and professional staff. I'm more than grateful for being referred.

For the last 5 or more years I have had awful stomach symptoms. Nausea while eating, before eating. Feeling full only a few bites in. Striking a gag reflex before I even put food in my mouth, day after day had completely worn me out in many ways. I went to (4) Gastrointestinal clinics almost begging them to find something.

I say with the most sincere smile, that Dr. Turner's system works. After my second visit ALL my stomach symptoms were absent... yeah gone. The feeling is indescribable. Did I mention I didn't even go to Texas Migrane Clinic for my stomach? I went for numbness in my fingers, elbow pain while doing physical activity. Neck and back tightness... you guessed it, he knocked out those symptoms one by one.

5 star. 10 of 10. Do yourself the biggest favor ever and set up an appointment. I couldn't be more positive about his program.

I've been seeing Dr. Turner at Texas Migraine Clinic for the past few months and I couldn't be happier with my progress or the practice. I've had chronic migraines for the past 7 years trying everything medication, Botox, acupuncture, supplementation and the list continues. I was having 15+ migraines a month with symptoms every day. I'm still working through the program with Dr. T but have only had 4 migraines this past month which I have been able to track to certain activities and my daily symptoms no longer exist. An additional and rather awesome service is that if you live anywhere but San Antonio you can do Skype/FaceTime sessions after your first in office consultation. Because of this service I am able to see Dr. Turner and continue my progress. I can't recommend Texas Migraine Clinic or Dr. Turner enough!

I was referred to Dr. Turner by my sinus Doctor. For years I have suffered with terrible sinus issues. I've had multiple surgeries and have taken every medicine that there is to take with no results. My sinus doctor told me that the pressure and pain with my sinuses were migraines and not sinuses. I thought he was crazy but decided to give it a shot and go see Dr. Turner.

When I arrived for my first appointment I was very skeptical. I didn't think he was going to be able to help me and that all I was doing was waisting my time and money. I could not have been more wrong.

Not only did Dr. Turner take away my sinus pain. He also fixed the pain and tension that I always seemed to have in my sholder and mid back. It turns out that those things were all related because of an out of place disc in my neck. I was shocked! His treatment worked so well on my sinus issues I decided to talk to Dr. Turner about the pains I had been having in my lower back. Turns out that my back pain was caused by the same thing. I've been going to the chiropracter and reciveing massage therapy for years. Those things helped but only on a temporary basis not a permanent fix. Dr. Turner offeres a permanet fix for pain.

I was under Dr. Turners care for about 5 months and now 4 months later I am still pain free. Around this time of year I'm usually miserable with allergies and sinus pain but now thanks to Dr. Turner and his staff this is the first year in a long time that I won't be sick during the holidays.

I am truly thankful for Dr. Turner and his staff. Being referred to his clinic was the best thing that happened to me this year. I highly recommend him to anyone suffering from migraines and any other types of pain. He will fix you and after the treatment is done you will wish that you would have gone to see him a long time ago.

Healthy Power Chiropractic

Kris Sutton shared a link. Just now

I've had chronic headaches and headaches since I was a kid. I've tried everything--meds, supplements, bodywork, acupuncture, chiro. In December, my doctor told me had nothing else for me. I was despondent. I happened upon the website for the Texas Migraine Clinic and thought I'd give it a try.

After 46 years of being alive, I FINALLY found something that worked. I thought I'd share it with you all because I wish I'd found it earlier.

Dr. Turner works with patients (in person and remotely) to heal damaged discs that cause nerve pain that flares up to create headache pain.

He does this through specific, prescribed exercises that you can do easily to change your spine. It works differently and better than chiropractic (which I love and have done for years). His background is as a PT and he has developed a system that specifically targets the discs and nerves that affect migraine pain.

I haven't had a migraine in 6 weeks and my neck has completely shifted. He also has exercises to shift the lumbar spine. This is a game-changer. I know it sounds like hyperbole. I'm so jaded I can't even begin to tell you! Seriously, this has made all the difference for me. I hope it helps you, too.

Here is the link to his website. <https://www.texasmigraineclinic.com/>

Holly Marie I've had migraines for over 10 years and Dr. Turner was so incredibly helpful in explaining the cause and treatment. The exercises he gave me were simple and worked!!! I haven't had a migraine in almost 2 months. Appointments were done via Zoom--so easy and convenient!! I am so very grateful to Dr. Turner for his excellent care!

Lilia Marek I've been suffering from migraines for years, often with daily headaches for months at a time. Dr. Turner is a miracle worker who has given me my life back! I tried everything else without success, and he was able to help me stay headache free in only a few weeks! I'm going back to him on occasion, when I get out of whack but he is able to get me back on track in 2 visits! He's truly caring and a wonderful person. I don't know what I would have done without him.

Maritza Jimenez Dr Turner's treatments are life changing! Best decision ever made was to see him. Even when we lived in El Paso, he used facetime to treat my hubby and it worked! Highly recommended! ★★★★★

Berenice Rendon Olivas This is the only treatment that has actually worked for me. I've had migraines since I was in elementary school. I am now 26. I suffered horrendous migraines. I was in the emergency room twice a month. I had migraine with aura, vertigo, nausea, vomiting, sensitivity to light/sound/smells. Everything seemed to trigger a migraine. I missed work so much. Important events because I couldn't get off my bed at all. I went to countless specialists that prescribed medication after medication but nothing absolutely nothing worked. It wouldn't even at least calm the pain. I had given up until my husband found out about Texas Migraine Clinic. I will admit I didn't have any hope for it but I decided to try it. I'm so glad I did because it gave me my life back. I have not had a migraine since I started the treatment with Dr. Turner back in May 2019. I've had a few headaches here and there but 1 or 2 Advil's does the trick when before I needed a cocktail of different pain killers in absurd quantities and not even like that did it minimize the pain. Dr. Turner is very responsive and even if you don't live in the same city, like myself, he can still help you. Thank you!

Mary Robinson For what its worth.. I was having daily migraines.. could not get a handle.. tried everything.. meds, acupuncture, acupressure, botox, changed diet, supplements, herbs, oils, and oil.. the full circle of treatments.. I have been seeing this doc for 2 weeks, and have only had 2 migraines!! Is it a fluke? I highly doubt it!!! Dr. Turner is amazing.. good luck, I hope you try it and pray it works!!

Stephanie Ann Chancellor Seven month of all day constant migraine headaches which didn't respond to meds/19 years of daily minor headaches or migraines. During 7 month severe span- no meds fixed them, chiropractic only slightly/temporarily improved the pain, and exercise made it worse. The only thing that finally helped was visiting Dr. Turner and getting my pinched nerves fixed in combination with Botox therapy and moving to the country.

I've been seeing Dr. Turner at Texas Migraine Clinic for the past few months and I couldn't be happier with my progress or the practice. I've had chronic migraines for the past 7 years trying everything medication, Botox, acupuncture, supplementation and the list continues. I was having 15+ migraines a month with symptoms every day. I'm still working through the program with Dr. T but have only had 4 migraines this past month which I have been able to track to certain activities and my daily symptoms no longer exist. An additional and rather awesome service is that if you live anywhere but San Antonio you can do Skype/FaceTime sessions after your first in office consultation. Because of this service I am able to see Dr. Turner and continue my progress. I can't recommend Texas Migraine Clinic or Dr. Turner enough!

Thanks Dr. Turner,

I had very bad headaches when I first visit you and taking a lot of meds. Now no more meds and I finally know the cause of those horrible headaches. I can identify triggers and work with the problem. Thanks a lot.

Very Respectfully

Over the holidays, I suddenly had severe head and neck pain to the point I was in bed for days, in a dark room, sensitive to touch and even vomiting. After being diagnosed with a pinched nerve in the ER, I researched non surgical options and found the clinic. Within a week my head pain was reduced significantly and other symptoms I didn't know were all related started going away (sinus pressure, nausea, inner ear itching, wrist pain, etc) By doing the prescribed neck exercises and visits working with Dr Turner over 3 months, the disk between C6-7 moved off my nerves. I now am able to detect early symptoms and stop it from progressing while I continue to heal.

I have been going here for over a year. This place is wonderful and this Dr. is great and has a great personality. He is firm and focused on resolving whatever issues. I began coming here for lower back and migraines. The results have been phenomenal and he cured my wife's planter fasciitis in one visit, but she does stick to the exercises twice daily. Not a day goes by where she does not do them. I highly recommend this place.

I was diagnosed with migraines more than 20 years ago. During that time, I have been treated by multiple neurologists. Sumatriptin injections relieve the headaches once I get them but no preventative. I tried various medications including Topamax and regular Botox injections. I also went to a chiropractor and tried acupuncture, without relief. At the time I first went to Dr. Turner at the Texas Migraine Clinic, I was having 10-12 migraines a month. Even on days I did not suffer from a migraine, my head did not feel good. I did not expect that Dr. Turner could help me, but I was encouraged to go, so I did. Immediately, seriously, I noted a change. I felt better on a daily basis and have reduced my migraines to about 4-6 per month. Even that may improve. I strongly encourage migraine sufferers to go. I can't say he can fix everyone but Dr. Turner helped me. I am so thankful.

For months I had debilitating headaches until it was discovered I may have a bulging cervical disc. Got some imaging done to reveal it was three discs. I worried it was going to be a surgical fix. Enter Dr. Turner and his staff! They were so wonderful and easy to work with and everyone was so genial and really warm to be around. Through their regimen of PT I was able to repair the damage to the discs and get back to a normal life. Before they helped me, I was on many, varied high powered painkillers and couldn't function, but I found relief with relatively simple methods of PT but highly effective exercises. Dr. Turner and his staff at Texas Migraine Clinic know their stuff to get you going and keep you from having the problems in the future!

Our Specialty: Lasting Relief for the Most Difficult & Severe Headache & Migraine Cases Worldwide. Clients include doctors, neurologists and other specialists as well.

After identifying the real cause behind headaches & migraines, we believe we have “cracked the code”, and have found out how to fix the true cause of headaches & migraines so they get “fixed” instead of “numbed”: all at the highest level possible. After each successful case, we’ve found that the headaches & migraines (no matter how difficult or intense) can stay gone in most cases.

Whereas other treatment options keep patients paying them (for years because they never get better), our goal is to make our patients so pain-free that they save all the time & money they would have spent on all those temporary/partial-relief options in the future once they finish our treatment.

Contact a receptionist today to get started.
